DATA SHEET

Version: 3
Revision date: 02/06/2025

1. Identification

Product name **TE Buffer (1x) Low EDTA, Sterile**
1000 mL (1x solution)

Cat. No **BR0018**

2. Description

Tris-EDTA (TE) is a solution which contains a buffer, Tris and chelating agent, EDTA. EDTA avoids the degradation of DNA and RNA by kidnapping of magnesium or other divalent metal ions. Generally, TE is used to solubilize DNA and RNA, protecting it from degradation. Moreover, in immunohistochemichal, formalin and other aldehyde fixation produce protein cross-link that masks the antigenic sites giving weak or false negative. TE buffer breaks the protein cross-link, unmasks the antigens and epitopes, therefore enhancing staining intensity of antibodies.

3. Specifications

Format: Liquid
Composition (1X): 10 mM Tris, 0.1 mM EDTA
Sterilization: purified using a 0.22 µm filtration process [aseptically filled]
Direction of use: Ready-to-use solution.

The pH should be 8 ± 0.2 at 25°C.

- The pH of the solution may require slight adjustment.
- Adjust pH with 1N HCl (if pH is high) or 1N NaOH (if pH is low).

4. Shipping and Storage specifications

TE buffer is shipped at room temperature. Store the product in a dry place at room temperature.

5. Applications

- DNA and RNA procedures, such as electrophoresis, storage, extraction, etc
- Immunohistochemistry procedures.

6. Quality

Manufactured in an **ISO 13485:2016 and GMP-certified facility**, located in Boecillo, Valladolid (Spain), under ISO9001:2016 procedures to ensure the highest quality standards.

7. Further information

Product Use Limitations This product is developed, designed and sold exclusively only for research purposes use. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.
